

TLB : Translation Look-aside Buffer

n-way associative : possibilité de scanner n entrees en parallele

The diagram shows a table with two columns: 'Page' and 'Case'. The first row has 'Page' and 'Case' in the header. The second row has '...' in both columns. The third row has '10' in the 'Page' column and '500' in the 'Case' column. The fourth row has '...' in both columns. To the left of the table, there are two horizontal arrows pointing right towards the 'Page' column, and two vertical arrows pointing down along the 'Page' column, indicating parallel access to multiple rows.

Page	Case
...	...
10	500
...	...
